**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-19 are allowed.

***Reasons for allowance***

2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 9, the reference of Nakazawa (U.S. 7,107,011) teaches estimation of reception thermal noise power, estimation of the ratio between a third-order distortion coefficient a.sub.3 and first-order coefficient a.sub.1 due to nonlinear interference or third-order intermodulation (TTP3), or estimation of leakage power from an adjacent channel etc (see col. 2, lines 8-17). And the reference of Suzuki (U.S. Pub. No. 2004/0116083) teaches determine the gain and phase of each compensation distortion that achieves a predetermined adjacent channel leakage power ratio for the frequency of occurrence of each resulting intermodulation distortion (see page 9 and 11, paragraphs [126, 137]). The above prior art of record, however, fail to disclose or render obvious an interference characteristic estimating means and its functions as specified in the claim. And also see the reasons as stated in applicant's response filed on 01-16-2009, on remarks page pages 5-9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
